

# Sustainability Promotion Framework

In June 2022, Fuji TV established a cross-functional Sustainability Committee, with the President and CEO serving as its chairman. The primary objective of this committee is to strengthen our commitment to achieving a sustainable society. It collaborates closely with the Group Compliance Committee to share challenges and risks and to develop strategies to address them. Furthermore, we have established a Sustainability Promotion Liaison Meeting as a subcommittee. Its role is to facilitate various activities, including the reporting of each company's initiatives and the development of new sustainability projects."
